# Programming Test Assignment

To be Performed in 1 Working Day

Instructions: Please use native language (for instance Javascript) to parse the HTML. Do not use libraries.

"use any language" application which will return me the latest 5 stories on Time.com's when I call it as an API. The URL is https://time.com

So I Will call the service like this, assuming the URL to the service is http://10.23.34.45/getTimeStories this is a simple GET call. In response I Want This, this is a JSON object array with the latest 5 stories, by parsing the page:

```
[
  {
    "title": "Saudi King Salman Hospitalized for Medical Tests",
    "link": "https://time.com/5868873/saudi-kind-salman-hospitalized/"
  },
  {
    "title": "Iran Executes Man Convicted of Spying on Soleimani",
    "link": "https://time.com/5868856/iran-executed-spy-soleimani/"
  },
  {
    "title": "Kim Jong Un Berates Officials Over Hospital Project",
    "link": "https://time.com/5868844/kim-jong-un-berate-hospital-officials/"
  },
  {
    "title": "Boy, 12, Driving Stolen Truck Leads Police on Chase",
    "link": "https://time.com/5868839/delaware-boy-stolen-truck-police/"
  },
  {
    "title": "N.J. Federal Judge's Son Killed, Husband Wounded",
    "link": "https://time.com/5868834/new-jersey-federal-judge-shooting/"
  }
]
